Birthday Problem

```
numOfSimulatedGames = 5000;
numGamesPlayed = 0;
successfulSwitch = 0;
count = 0;
same = false;
probabilityOfSuccess=zeros(1,numOfSimulatedGames);
people = zeros(1,30);
for numGamesPlayed = 1:numOfSimulatedGames
    for i = 1:30
        people(i) = ceil(365*rand());
        for j = 1:i-1
            if(people(i)==people(j))
                same = true;
            end
        end
        if same == true
            count = count + 1;
        end
        same = false;
    end
    probabilityOfSuccess(numGamesPlayed)= count/numGamesPlayed;
end

xaxis = 1:numGamesPlayed;
scatter(xaxis,probabilityOfSuccess, '.')
xlabel('Number of games played')
ylabel('Probability of a success')
```
